

1. Description

The E-Maax Sensor Hub allows multiple sensors to connect to a single regulator port. In both the PRO and PLUS regulators more sensors need to connect than there are available ports directly on the regulator. To resolve this shortage the Sensor Hub provides the additional connectivity.

2. Specifications

The Sensor Hub is 115 mm x 65 mm x 32mm plastic housing containing 3 female connection ports. A 1 m cable is fitted with a male connector which will fit to the regulator port. The 3 female connectors allow 3 sensors to now connect to the regulator. Often a second Sensor Hub is used allowing sensors for the battery to be connector to a common Sensor Hub and the same sensors for the alternator connected to the second Sensor Hub.
